

A92.11/11: Pot 1-2 (1-69)

TOTAL POTATO STOCKS
ON JANUARY 1, 1969

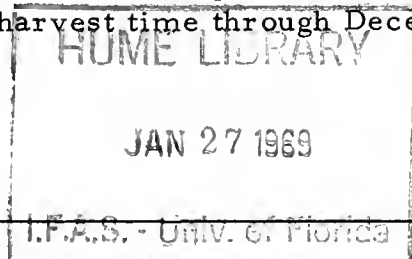

Release:
January 13, 1969
3:00 P.M. (E.S.T.)

Storage stocks of potatoes held by growers and local dealers in the fall producing areas of the country totaled 128.8 million hundredweight on January 1, 1969, according to the Crop Reporting Board. Stocks for January 1 were 8 percent below the record holdings of 139.4 million hundredweight on hand January 1, 1968. These stocks consist of potatoes held for all uses on January 1.

The eight eastern fall States had 40.8 million hundredweight of potatoes on hand January 1, 1969, 7 percent less than the 43.6 million a year earlier. Maine stocks, at 28.7 million this year, were below the 29.6 million hundredweight on hand January 1, 1968. Stocks in Pennsylvania and Upstate New York were below a year earlier but Long Island stocks were equal to a year ago. January 1 stocks in the eight central fall States, of 28.0 million this year are only slightly less than a year earlier. Holdings larger than a year ago in the Dakota's about offset reduced stocks in other central States. In the nine western fall States, January 1 stocks totaled 60.1 million hundredweight, 11 percent below the record holdings of 67.7 million a year earlier. Stocks are below a year earlier in all the western States except Washington and Montana where they equaled 1968 levels. Stocks in Idaho, at 34.5 million compared with 40.0 million a year earlier, accounted for 27 percent of the January 1 holdings in the fall States.

Disappearance of 1968 fall crop potatoes from storage during December was 22.6 million hundredweight. This compared with the disappearance of 22.4 million hundredweight during December 1967 and the record high of 25.3 million during December 1966. Disappearance of 1968 fall potatoes from time of harvest to January 1, 1969 was 91.2 million hundredweight. During the 1967 season, disappearance to January 1 was 91.9 million and for the 1966 season, it was 100.4 million.

Movement of fall crop potatoes to chippers and fresh market outlets during December was below last year as indicated by rail and truck unloads in 41 cities. Unloads for the season, from harvest time through December also were less than the comparable period a year earlier. The quantities of potatoes processed for other food uses (excluding starch and flour) during December as well as for the season to January 1 were above a year earlier. Fall potatoes utilized for starch and flour during December and from harvest time through December were below the same periods in 1967.

Fall Potatoes: Production, December 1, January 1, February 1 and March 1, total stocks, crops of 1959-68 in the 25 fall States
